PROFESSIONAL SUMMARY

n8n Level 2 Certified Developer and Verified Template Creator with hands-on experience deploying 25+ production-grade automation workflows for real clients and an in-house digital marketing agency. At AiMark Labs, architected and delivered end-to-end AI-powered systems — eliminating manual processes across lead generation, internal operations, and client analytics — cutting operational workload by up to 70% and accelerating delivery timelines from weeks to 48 hours. Trusted by the global n8n community as a Verified Creator whose templates are actively deployed by developers worldwide.

KEY ACHIEVEMENTS

- ▶ Eliminated up to 70% of manual workload per client by replacing human-touch processes with event-driven n8n pipelines across CRM, email, reporting, and team operations.
- ▶ Automated AiMark Labs' entire lead generation system end-to-end — from prospecting to AI-personalized outreach — scaling outbound volume 5× with zero additional headcount.
- ▶ Automated internal team operations at AiMark Labs, cutting cross-team coordination overhead and enabling the agency to scale delivery without growing headcount.
- ▶ Reduced AI support response time from hours to under 5 seconds via a RAG-powered customer support agent routing 100% of tier-1 queries automatically with <15% human escalation.
- ▶ Published 3+ templates accepted into n8n's official library — one of a select group of Verified Creators globally.
- ▶ Integrated 15+ REST APIs (OpenAI, Claude, Gmail, Google Sheets, Slack, Meta Graph API, CRMs) with OAuth, error handling, retries, and structured logging — achieving near-zero failed execution rates.

EXPERIENCE

AI Automation Engineer | **AiMark Labs — Islamabad, Pakistan** *Apr 2025 – Present*

aimarklabs.com | Full-service Digital Marketing Agency

- ▶ Architected and delivered a fully automated lead generation system — Apify scraping → Hunter.io enrichment → Claude/OpenAI AI-personalization → Gmail outreach — outputting 100+ qualified leads/day with zero manual input.
- ▶ Automated internal team operations end-to-end: built n8n workflows for task routing, Slack notifications, Google Sheets CRM updates, and reporting — reducing team coordination overhead by 60%+.
- ▶ Built a client analytics dashboard with live Meta Graph API token management (multiple Business Manager apps), enabling real-time ad performance visibility for agency clients.
- ▶ Engineered a Slack-integrated content automation system replacing a manual social media pipeline — human-in-the-loop approvals via Slack, AI content generation via Claude API, Google Sheets as CRM backbone.
- ▶ Implemented reply detection, duplicate send guards, and email deliverability optimizations across outreach pipelines — achieving near-zero failed sends and no cross-contamination.

n8n Developer & AI Automation Engineer | **Independent / Remote Clients** *Aug 2024 – Apr 2025*

- ▶ Built and deployed 20+ production n8n workflows for clients across lead generation, inbox automation, and customer support — each delivered live within 48 hours of scoping.
- ▶ Deployed a RAG-based AI customer support agent reducing tier-1 response time from hours to under 5 seconds, with automated Slack/email escalation for edge cases.
- ▶ Engineered an LLM-powered Gmail triage system classifying, prioritizing, and routing 100% of inbound email — eliminating 2+ hrs/day of manual inbox management.
- ▶ Integrated 15+ REST APIs into modular n8n workflows with OAuth, error handling, retries, and structured logging — achieving near-zero failed execution rates across all deployments.

Verified Creator — n8n Official Template Library *2024 – Present*

- ▶ Accepted into the Verified Creator program — one of a select group of global contributors recognized for production-quality workflow standards.
- ▶ Published modular, reusable templates covering advanced API integrations, AI orchestration, and multi-platform automation — actively downloaded and deployed by developers worldwide.

SIGNATURE PROJECTS

AiMark Labs — End-to-End Lead Generation & AI Outreach Engine

- ▶ Replaced a 3-person manual prospecting process with a fully automated n8n pipeline: Apify scraping → Hunter.io enrichment → Claude/OpenAI AI-personalized outreach via Gmail.
- ▶ Scaled outbound volume 5× without adding headcount. Researcher hours reduced to zero. Pipeline outputs 100+ qualified leads/day on schedule with duplicate guards and reply detection.

AiMark Labs — Internal Operations Automation

- ▶ Automated cross-team workflows covering task assignment, status reporting, Slack notifications, and CRM updates — cutting operational overhead by 60%+ and eliminating manual coordination bottlenecks.
- ▶ Reduced CRM update lag from same-day manual entry to under 30 seconds via webhook-triggered real-time pipelines.

RAG-Powered AI Customer Support Agent

- ▶ Built end-to-end AI support automation: vector knowledge base ingestion, LLM contextual response generation, automated routing and escalation via Slack and email.
- ▶ Achieved sub-5-second AI response time for tier-1 queries; human escalation rate reduced to under 15%.

Gmail AI Inbox Management System

- ▶ Engineered an LLM-powered email triage system using Gmail API + n8n: classifies, prioritizes, and routes 100% of inbound email automatically — eliminating 2+ hrs/day of manual inbox processing.
- ▶ Zero false-positive escalations after tuning intent-detection prompts across 500+ test emails.

TECHNICAL SKILLS

Automation: n8n (Advanced — Level 2 Certified) · Event-Driven Architecture · Webhook Pipelines · Scheduling · Error Handling · Modular Pipeline Design

AI / LLM: Claude API · OpenAI API · RAG (Retrieval-Augmented Generation) · Prompt Engineering · AI Content Automation · LLM Orchestration

Integrations: REST APIs · OAuth · Gmail API · Meta Graph API · Google Sheets · Slack · CRM Systems · Third-Party SaaS · Webhooks · Apify · Hunter.io

Dev Tools: JavaScript · Node.js · JSON Processing · Git · GitHub · Postman · Linux · Cloud Deployments

Domains: Lead Generation · Inbox Management · Customer Support AI · CRM Automation · Internal Ops Automation · Social Media Automation · Client Analytics

EDUCATION

Bachelor of Science in Computer Science 2021 – 2025

FAST National University of Computer and Emerging Sciences (NUCES) — Islamabad, Pakistan

CERTIFICATIONS & RECOGNITION

- ▶ n8n Level 2 Certified Developer — n8n.io
- ▶ Verified n8n Template Creator — n8n Official Template Library (selected globally)
